Background:	Synonyms: CMT4F, Periaxin, PRX, KIAA1620 Background: Seems to be required for maintenance of peripheral nerve myelin sheath. May
	have a role in axon-glial interactions, possibly by interacting with the cytoplasmic domains of
	integral membrane proteins such as myelin-associated glycoprotein in the periaxonal regions of
	the Schwann cell plasma membrane. May have a role in the early phases of myelin deposition.
