## Overview

|                      |                                                                                                                                |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------|
| Quantity:            | 100 µL                                                                                                                         |
| Target:              | RFFL                                                                                                                           |
| Binding Specificity: | AA 251-363                                                                                                                     |
| Reactivity:          | Human, Mouse                                                                                                                   |
| Host:                | Rabbit                                                                                                                         |
| Clonality:           | Polyclonal                                                                                                                     |
| Conjugate:           | This RFFL antibody is conjugated to Cy5.5                                                                                      |
| Application:         | Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p)) |

## Product Details

|                       |                                                                             |
|-----------------------|-----------------------------------------------------------------------------|
| Immunogen:            | KLH conjugated synthetic peptide derived from human RING finger protein 189 |
| Isotype:              | IgG                                                                         |
| Cross-Reactivity:     | Human, Mouse                                                                |
| Predicted Reactivity: | Rat,Dog,Cow,Sheep,Pig,Rabbit                                                |
| Purification:         | Purified by Protein A.                                                      |

## Target Details

|                   |                                                           |
|-------------------|-----------------------------------------------------------|
| Target:           | RFFL                                                      |
| Alternative Name: | RING finger protein 189 ( <a href="#">RFFL Products</a> ) |

## Target Details

|             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Background: | <p>Synonyms: CARP-2, CARP2, Caspase regulator CARP2, Caspases 8 and 10 associated RING finger protein 2, Caspases-8 and -10-associated RING finger protein 2, E3 ubiquitin protein ligase rylin, E3 ubiquitin-protein ligase rylin, Fring, FYVE RING finger protein Sakura, FYVE-RING finger protein Sakura, Rffl, RFFL_HUMAN, Rylin, RING finger and FYVE like domain containing protein, RING finger and FYVE-like domain-containing protein 1, RING finger protein 189, RING finger protein 34 like, RING finger protein 34-like, RNF189, RNF34L.</p> <p>Background: Has E3 ubiquitin protein ligase activity. Regulates the levels of CASP8 and CASP10 by targeting them for proteasomal degradation. Has anti-apoptotic activity. May bind phosphatidylinositol phosphates.</p> |

## Application Details

|                    |                                                              |
|--------------------|--------------------------------------------------------------|
| Application Notes: | IF(IHC-P) 1:50-200<br>IF(IHC-F) 1:50-200<br>IF(ICC) 1:50-200 |
|--------------------|--------------------------------------------------------------|

|               |                       |
|---------------|-----------------------|
| Restrictions: | For Research Use only |
|---------------|-----------------------|

## Handling

|                    |                                                                                                                    |
|--------------------|--------------------------------------------------------------------------------------------------------------------|
| Format:            | Liquid                                                                                                             |
| Concentration:     | 1 µg/µL                                                                                                            |
| Buffer:            | Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.        |
| Preservative:      | ProClin                                                                                                            |
| Precaution of Use: | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only. |
| Storage:           | -20 °C                                                                                                             |
| Storage Comment:   | Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.                                  |
| Expiry Date:       | 12 months                                                                                                          |
