## Datasheet for ABIN914912 anti-Septin 14 antibody (AA 351-432) (AbBy Fluor® 488)

Overview

| Quantity:            | 100 µL                                                                                                                         |  |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------|--|
| Target:              | Septin 14 (SEPT14)                                                                                                             |  |
| Binding Specificity: | AA 351-432                                                                                                                     |  |
| Reactivity:          | Mouse, Rat                                                                                                                     |  |
| Host:                | Rabbit                                                                                                                         |  |
| Clonality:           | Polyclonal                                                                                                                     |  |
| Conjugate:           | This Septin 14 antibody is conjugated to AbBy Fluor® 488                                                                       |  |
| Application:         | Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p)) |  |

## Product Details

| Immunogen:            | KLH conjugated synthetic peptide derived from human SEPT14 |
|-----------------------|------------------------------------------------------------|
| lsotype:              | IgG                                                        |
| Cross-Reactivity:     | Mouse, Rat                                                 |
| Predicted Reactivity: | Human                                                      |
| Purification:         | Purified by Protein A.                                     |
| Target Details        |                                                            |
| Target:               | Septin 14 (SEPT14)                                         |
| Alternative Name:     | 14-Sep (SEPT14 Products)                                   |

| Target Details      |                                                                                                    |  |
|---------------------|----------------------------------------------------------------------------------------------------|--|
| Background:         | Synonyms: Septin-14, SEPT14                                                                        |  |
|                     | Background: Septin 14, also known as SEPT14, is a 432 amino acid protein that belongs to the       |  |
|                     | septin family. The highly conserved septin family of GTP-binding cytoskeletal proteins is          |  |
|                     | implicated in membrane transport, apoptosis, cell polarity, cell cycle regulation, cytokinesis and |  |
|                     | other cellular functions. Septins polymerize into heterooligomeric protein complexes that form     |  |
|                     | filaments, and can associate with cellular membranes, actin filaments and microtubules. Septir     |  |
|                     | 14 has a GTPase domain followed by a C-terminal coiled-coil domain characteristic of group II      |  |
|                     | septins. Septin 14 interacted with all septins except those that are members of its phylogenetic   |  |
|                     | cluster, including itself. Septin 14 shares highest identity (67 % ) with Septin 10. Expressed in  |  |
|                     | testis and more weakly in fetal liver, tonsil and thymus, the Septin 14 protein is not detected in |  |
|                     | testicular cancer or other normal or cancer cell lines. The Septin 14 gene is conserved in         |  |
|                     | chimpanzee, dog, cow, mouse and rat, and maps to human chromosome 7p11.2.                          |  |
| Gene ID:            | 346288                                                                                             |  |
| UniProt:            | Q6ZU15                                                                                             |  |
| Application Details |                                                                                                    |  |
| Application Notes:  | IF(IHC-P) 1:50-200                                                                                 |  |
|                     | IF(IHC-F) 1:50-200                                                                                 |  |
|                     | IF(ICC) 1:50-200                                                                                   |  |
| Restrictions:       | For Research Use only                                                                              |  |
| Handling            |                                                                                                    |  |
| Format:             | Liquid                                                                                             |  |
| Concentration:      | 1 µg/µL                                                                                            |  |
| Buffer:             | Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and       |  |
|                     | 50 % Glycerol.                                                                                     |  |
| Preservative:       | ProClin                                                                                            |  |
| Precaution of Use:  | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be                |  |
|                     | handled by trained staff only.                                                                     |  |
| Storage:            | -20 °C                                                                                             |  |
| Storage Comment:    | Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.                  |  |
