## Target Details

Background:	<p>Synonyms: CAC, CACT, Carnitine/acylcarnitine translocase, Solute carrier family 25 member 20, MCAT_HUMAN.</p> <p>Background: SLC25A20 is one of several closely related mitochondrial membrane carrier proteins that shuttle substrates between cytosol and the intramitochondrial matrix space. It mediates the transport of acylcarnitines into the mitochondrial matrix for their oxidation by the mitochondrial fatty acid oxidation pathway. Mutations in this gene are associated with carnitine acylcarnitine translocase deficiency, which can cause a variety of pathological conditions such as hypoglycemia, cardiac arrest, hepatomegaly, hepatic dysfunction and muscle weakness, and is usually lethal in new born and infants.</p>
