## Target Details

Lymphoid-specific helicase, Nbla10143, PASG, proliferation associated SNF2 like protein, proliferation-associated SNF2-like protein, SWI/SNF2 related matrix associated actin dependent regulator of chromatin subfamily A member 6 , SWI/SNF2-related matrix-associated actin-dependent regulator of chromatin subfamily A member 6.

Background: SMARCA6 gene encodes a lymphoid-specific helicase. Other helicases function in processes involving DNA strand separation, including replication, repair, recombination, and transcription. This protein is thought to be involved with cellular proliferation and may play a role in leukemogenesis.
