| Background:         | Synonyms: C21, DC42, IRA1, TBLR1, F-box-like/WD repeat-containing protein TBL1XR1, Nuclear<br>receptor corepressor/HDAC3 complex subunit TBLR1, TBL1-related protein 1, Transducin beta-<br>like 1X-related protein 1, TBL1XR1<br>Background: F-box-like protein involved in the recruitment of the ubiquitin/19S proteasome<br>complex to nuclear receptor-regulated transcription units. Plays an essential role in<br>transcription activation mediated by nuclear receptors. Probably acts as integral component of<br>the N-Cor corepressor complex that mediates the recruitment of the 19S proteasome complex,<br>leading to the subsequent proteasomal degradation of N-Cor complex, thereby allowing<br>cofactor exchange, and transcription activation. |
