

Datasheet for ABIN925529
Freund'S Incomplete Adjuvant

[Go to Product page](#)

Overview

Quantity: 50 mL

Product Details

Sterility: Sterile, Autoclaved

Target Details

Background: Special formulation of adjuvant containing paraffin oil and surfactant.

Application Details

Application Notes: Freund's adjuvant may be used to form water-in-oil emulsions with antigens for the injection of immunogens for antibody production. Proper emulsion formation is essential and should be tested by observing a drop of the emulsion on the surface of water which should 'bead and not disperse. Antigens properly emulsified stimulate a strong and long-lasting immune response due to the slow release of antigen into the host's system.

Comment: Special formulation of adjuvant containing paraffin oil and surfactant.

Restrictions: For Research Use only

Handling

Format: Liquid

Handling Advice: do not freeze.

Storage: 4 °C

Expiry Date: 12 months
