Datasheet for ABIN925562
SDS-PAGE Destain Solution

Overview

Quantity:	1 L
Application:	SDS-PAGE (SDS)

Product Details

Characteristics:	Destain Solution is a uniquely formulated, ready-to-use reagent specifically designed for in-gel visualization of Coomassie Blue stained total protein in polyacrylamide gels. The proprietary formulation of the solution ensures high detection sensitivity and low backgrounds.
Purification:	This solution contains alcohol and acetic acid in a proprietary combination to enhance sensitivity/noise ratio.

Application Details

Application Notes:	This product is ready-to-use as a working 1X solution and requires no further dilution. This solution contains alcohol and acetic acid in a proprietary combination to enhance sensitivity/noise ratio.
Restrictions:	For Research Use only

Handling

Format:	Liquid
Storage:	RT
