Datasheet for ABIN925566

5.0 M Ammonium Acetate

Overview

Quantity: 100 mL

Product Details

Characteristics: Sterilization: Sterile Aseptic Filter

Target Details

Background: Ammonium Acetate can be used for the precipitations of proteins and as a multipurpose buffer solution. Diethylpyrocarbonate (DEPC) is used to inactivate RNase enzymes in water and can also be used to affect the double-stranded structure of a DNA molecule. 5.0 M Ammonium Acetate is ideal for investigators in Molecular Biology, Cell Biology, and Immunology research. Synonyms: CH₃COONH₄, Diethylpyrocarbonate

Application Details

Application Notes: 5.0 Ammonium Acetate is a concentrated stock solution and should be diluted appropriately with distilled, deionized water or equivalent to its final working concentration. This buffer contains untitrated 5.0 M Ammonium Acetate. Meticulously prepared using ultra pure reagents dissolved in highly polished pharmaceutical grade deionized water treated with diethyl pyrocarbonate (DEPC).

Restrictions: For Research Use only

Handling

Format: Liquid

Storage: RT
