Target Details

Target:	RELB
Alternative Name:	RELB
Background:	RelB is a member of the Rel/nuclear factor (NF)-kappa B family of transcription factors, defects in RelB affects antigen presenting cells and the formation of lymphoid organs. Targeted disruption of the Rel/NF-kappaB family members NF-kappaB2, encoding p100/p52, and RelB in mice results in anatomical defects of secondary lymphoid tissues. Synonyms: Polyclonal RELB antibody, Anti-RELB antibody.
