### Overview

|              |                                     |
|--------------|-------------------------------------|
| Quantity:    | 10 mL                               |
| Target:      | APOE                                |
| Reactivity:  | Mammalian                           |
| Host:        | Goat                                |
| Clonality:   | Polyclonal                          |
| Conjugate:   | This APOE antibody is un-conjugated |
| Application: | Please inquire                      |

### Product Details

#### Target Details

|                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | APOE                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Alternative Name: | ApoE ( <a href="#">APOE Products</a> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Background:       | <p>Apolipoprotein E serves as a ligand for low density receptors and participates in the transport and redistribution of cholesterol and other lipids. Other functions include immunoregulation and cell growth modulation and differentiation. Apo E is thought to be involved in tissue repair as increased amounts of the protein are found at sites of peripheral nerve injury and regeneration. A mutant form is associated with familial type III hyperlipoproteinemia. Synonyms: Polyclonal ApoE antibody, Anti-ApoE antibody, Apolipoprotein E antibody, APO E antibody, Apo-E antibody, VLDL antibody, Very Low Density Lipoprotein antibody.</p> |
| Pathways:         | <a href="#">Regulation of Cell Size, Lipid Metabolism</a>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

Application Details

|                    |                                                              |
|--------------------|--------------------------------------------------------------|
| Application Notes: | Optimal conditions should be determined by the investigator. |
| Restrictions:      | For Research Use only                                        |

Handling

|                |              |
|----------------|--------------|
| Format:        | Liquid       |
| Concentration: | Lot specific |
| Storage:       | 4 °C         |
