Target Details

Target:	ZNF280B
Alternative Name:	ZNF280B (ZNF280B Products)
Background:	ZNF280B contains 4 C2H2-type zinc fingers. It may function as a transcription factor. This gene was identified by homology to other species. Its encoded protein is approximately 78-88% identical to a predicted sheep protein of unknown function. The protein is also approximately 25% identical to the Drosophila protein suppressor of hairy wing, which is a leucine zipper protein that represses the function of transcriptional enhancers of the gypsy retrotransposon.
