

## Datasheet for ABIN929859 Donkey Plasma

[Go to Product page](#)

### Overview

---

Quantity: 100 mL

Host: Donkey

### Product Details

---

### Application Details

---

**Comment:** Blood plasma is the yellow liquid component of blood in which the blood cells in whole blood are normally suspended. It makes up about 55% of the total blood volume. It is the intravascular fluid part of extracellular fluid (all body fluid outside of cells). It is mostly water (93% by volume) and contains dissolved proteins, glucose, clotting factors, mineral ions, hormones and carbon dioxide (plasma being the main medium for excretory product transportation). Synonyms: Donkey Plasma.

**Restrictions:** For Research Use only

### Handling

---

**Format:** Liquid

**Concentration:** Typically 5-7 g/dL

**Buffer:** Supplied as a liquid, no preservatives.  
Biohazard Informations: Material was collected from normal, healthy animals. Material was processed and frozen the same day as collection. Animals were fasted prior to collection.

**Preservative:** Without preservative

**Storage:** -20 °C
