

## Datasheet for ABIN929875

### Pig Plasma

[Go to Product page](#)

#### Overview

Quantity:	1 L
Host:	Pig

#### Product Details

Characteristics:	Blood plasma is the yellow liquid component of blood in which the blood cells in whole blood are normally suspended. It makes up about 55% of the total blood volume. It is the intravascular fluid part of extracellular fluid (all body fluid outside of cells). It is mostly water (93% by volume) and contains dissolved proteins, glucose, clotting factors, mineral ions, hormones and carbon dioxide (plasma being the main medium for excretory product transportation). Synonyms: Porcine Plasma, Swine Plasma.
Sterility:	Sterile filtered

#### Application Details

Restrictions:	For Research Use only
---------------	-----------------------

#### Handling

Format:	Liquid
Concentration:	Typically 5-7 g/dL
Buffer:	Clear amber liquid in K2EDTA with no preservatives, pH 7.7, 0.2 um filtered. Biohazard Informations: Material was collected from normal, healthy animals. Material was processed and frozen the same day as collection. Animals were fasted prior to collection.
Preservative:	Without preservative

## Handling

---

Storage: -20 °C
