

## Datasheet for ABIN934084 anti-Salmonella antibody

Overview

Quantity:	200 µg
Target:	Salmonella
Reactivity:	Salmonella
Host:	Mouse
Clonality:	Monoclonal
Application:	ELISA, Immunofluorescence (IF)
Product Details	
Immunogen:	Salmonella antibody (LPS core) was raised in mouse using LPS core of Salmonella as the
	immunogen.
Clone:	M9011223
lsotype:	lgG3
Cross-Reactivity (Details):	This antibopdy recognizes the LPS core protein and reacts with all Salmonella O-serogroups
	tested: A, B, C1 C2, D, E1, E3, E4, F, G1 and G2
Purity:	> 90 % pure
Target Details	
Target:	Salmonella
Abstract:	Salmonella Products
Target Type:	Bacteria

## Target Details

## Background:Salmonella is a genus of rod-shaped, Gram-negative, non-spore-forming, predominantly motile<br/>enterobacteria with diameters around 0.7 to 1.5 um, lengths from 2 to 5 um, and flagella which<br/>grade in all directions. They are chemoorganotrophs, obtaining their energy from oxidation and<br/>reduction reactions using organic sources, and are facultative anaerobes. Most species<br/>produce hydrogen sulfide, which can readily be detected by growing them on media containing<br/>ferrous sulfate, such as TSI. Synonyms: Monoclonal Salmonella antibody (LPS core), Anti-<br/>Salmonella antibody (LPS core), Salmonella typhimurium antibody.

## Application Details

Application Notes:	Optimal conditions should be determined byt he investigator.
Comment:	Matched pair antibody available for Salmonella antibody (LPS core): ABIN933912
Restrictions:	For Research Use only
Handling	
Concentration:	Lot specific
Buffer:	10 mM PBS, pH 7.2, with 0.1 % NaN3.
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium Azide: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Handling Advice:	Avoid repeated freeze/thaw cycles. Dilute only prior to immediate use.
Storage:	-20 °C
Storage Comment:	Aliquot and store at -20 °C.
