

Datasheet for ABIN934305 **anti-PRCP antibody**

[Go to Product page](#)

Overview

Quantity:	1 mg
Target:	PRCP
Reactivity:	Mammalian
Host:	Mouse
Clonality:	Monoclonal

Product Details

Target Details

Target:	PRCP
Alternative Name:	PCP (PRCP Products)

Background: Phencyclidine (PCP) is a recreational, dissociative drug formerly used as an anesthetic agent, exhibiting hallucinogenic and neurotoxic effects. PCP works primarily as an NMDA, (N-Methyl-D-Aspartic acid), receptor antagonist, which blocks the activity of the NMDA receptor and, like most antigitamatergic hallucinogens, is significantly more dangerous than other categories of hallucinogens. Synonyms: Monoclonal Phencyclidine antibody, Anti-Phencyclidine antibody, Monoclonal PCP antibody, Anti-PCP antibody.

Application Details

Application Notes:	Optimal conditions should be determined by the investigator.
Restrictions:	For Research Use only

Handling

Concentration: Lot specific

Storage: 4 °C
