

Datasheet for ABIN934542

DENV Protein

[Go to Product page](#)

Overview

Quantity:	1 mL
Target:	DENV
Origin:	Dengue Virus
Source:	Dengue Virus
Protein Type:	Native
Application:	Conjugation (Con), Lateral Flow (LF), ELISA, Western Blotting (WB)

Product Details

Purification:	Sucrose density gradient centrifugation
Purity:	Highly pure

Target Details

Target:	DENV
Alternative Name:	Dengue Virus (DENV Products)
Target Type:	Virus

Application Details

Restrictions:	For Research Use only
---------------	-----------------------

Handling

Format:	Liquid
---------	--------

Handling

Buffer:	Supplied frozen following purification by sucrose gradient and ultra centrifugation.
Precaution of Use:	Inactivated by room temperature incubation with formaldehyde. The formaldehyde is neutralized with the addition of sodium bisulphite. Generally accepted good laboratory practices appropriate to biological reagents should be employed when handling this product.
Storage:	4 °C/-20 °C/-80 °C
