### Target Details

Target:	FAM19A2
Alternative Name:	TFAA2 ( <a href="#">FAM19A2 Products</a> )
Background:	TFAA proteins are a newly discovered family of proteins, which are distantly related to MIP-1a, a member of the CC-chemokine family. TFAA mRNAs are highly expressed in specific brain regions, and have also been found to be expressed by lung basophils. The biological function of TFAA-2 is still unknown.
