## Datasheet for ABIN93963 anti-CD14 antibody

4 Images

8 Publications

#### Overview

Quantity:	0.1 mg
Target:	CD14
Reactivity:	Human, Non-Human Primate
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This CD14 antibody is un-conjugated
Application:	Flow Cytometry (FACS), Western Blotting (WB), ELISA, Immunoprecipitation (IP)
Product Details	
Immunogen:	A crude mixture of human urinary proteins precipitated by ammonium sulphate from the urine
	of a patient suffering from proteinuria.
Clone:	MEM-18
lsotype:	lgG1
Specificity:	The antibody MEM-18 reacts with CD14, a 53-55 kDa GPI (glycosylphosphatidylinositol)-linked
	extracellular membrane glycoprotein expressed on monocytes, macrophages and weakly on
	granulocytes, also expressed by most tissue macrophages. In human, the epitope recognized
	by MEM-18 is located between amino acids 57-64.
Cross-Reactivity (Details):	Non-Human Primates, Human
Purification:	Purified by protein-A affinity chromatography.
Purity:	> 95 % (by SDS-PAGE)

### Product Details

#### Endotoxin Level:

Low Endotoxin

### Target Details

Target:	CD14
Alternative Name:	CD14 (CD14 Products)
Background:	CD14 Molecule,CD14 is a 55 kDa GPI-anchored glycoprotein, constitutively expressed on the
	surface of mature monocytes, macrophages, and neutrophils, where it serves as a
	multifunctional lipopolysaccharide receptor. It is also released to the serum both as a secreted
	and enzymatically cleaved GPI-anchored form. CD14 binds lipopolysaccharide molecule in a
	reaction catalyzed by lipopolysaccharide-binding protein (LBP), an acute phase serum protein.
	The soluble sCD14 is able to discriminate slight structural differences between
	lipopolysaccharides and is important for neutralization of serum allochthonous
	lipopolysaccharides by reconstituted lipoprotein particles. CD14 affects allergic, inflammatory
	and infectious processes.,LPS-receptor, LPSR, MCLR
Gene ID:	929
UniProt:	P08571
Pathways:	TLR Signaling, Activation of Innate immune Response, Cellular Response to Molecule of
	Bacterial Origin, Toll-Like Receptors Cascades
Application Details	
Application Notes:	ELISA: The antibody MEM-18 has been tested as the detection antibody in a sandwich ELISA for
	analysis of human CD14 in combination with antibody B-A8 (cat. no. 11-304-C100).
	Flow cytometry: recommended dilution: 4 µg/mL.
	Western blotting: Non-reducing conditions.
Restrictions:	For Research Use only
Handling	
Concentration:	1 mg/mL
Buffer:	Phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which
