_					
U	V	er	VI	е	W

Quantity:	0.1 mg
Target:	CD4
Binding Specificity:	N-Term
Reactivity:	Human
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This CD4 antibody is un-conjugated
Application:	Flow Cytometry (FACS), Western Blotting (WB), Cytometry by Time of Flight (CyTOF)

Product Details

Immunogen:	2 N-terminal domains of human CD4 fused to human IgG1 Fc
Clone:	MEM-241
Isotype:	lgG1
Specificity:	The antibody MEM-241 recognizes an extracellular epitope of CD4 antigen, a 55 kDa transmebrane glycoprotein expressed on a subset of T lymphocytes (",helper", T-cells) and also on monocytes, tissue macrophages and granulocytes.
Cross-Reactivity (Details):	Human, Other not tested
Purification:	Purified by protein-A affinity chromatography.
Purity:	> 95 % (by SDS-PAGE)

Target Details

Target:	CD4		
Alternative Name:	CD4 (CD4 Products)		
Background:	CD4 Molecule,CD4 (T4) is a single chain transmembrane glycoprotein and belongs to immunoglobulin supergene family. In extracellular region there are 4 immunoglobulin-like domains (1 lg-like V-type and 3 lg-like C2-type). Transmembrane region forms 25 aa, cytoplasmic tail consists of 38 aa. Domains 1,2 and 4 are stabilized by disulfide bonds. The intracellular domain of CD4 is associated with p56Lck, a Src-like protein tyrosine kinase. It was described that CD4 segregates into specific detergent-resistant T-cell membrane microdomains. Extracellular ligands: MHC class II molecules (binds to CDR2-like region in CD4 domain 1), HIV envelope protein gp120 (binds to CDR2-like region in CD4 domain 1), IL-16 (binds to CD4 domain 3), human seminal plasma glycoprotein gp17 (binds to CD4 domain 1), L selectin. Intracellular ligands: p56LckCD4 is a co-receptor involved in immune response (co-receptor activity in binding to MHC class II molecules) and HIV infection (human immunodeficiency virus, CD4 is primary receptor for HIV-1 surface glycoprotein gp120). CD4 regulates T-cell activation, T/B-cell adhesion, T-cell diferentiation, T-cell selection and signal transduction. Defects in antigen presentation (MHC class II) cause dysfunction of CD4+ T-cells and their almost complete absence in patients blood, tissue and organs (SCID immunodeficiency).,T4/Leu-3, L3T4		
Gene ID:	920		
UniProt:	P01730		
Pathways:	TCR Signaling, Maintenance of Protein Location, CXCR4-mediated Signaling Events		
Application Details			
Application Notes:	Flow cytometry: Recommended dilution: 1-5 μ g/mL, positive control: peripheral blood, HPB T cell line. This antibody is excellent antibody for FC application. Western blotting: Recommended dilution: 1-2 μ g/mL, positive control: peripheral blood, HPB T cell line, non-reducing conditions.		
Restrictions:	For Research Use only		
Handling			
Concentration:	1 mg/mL		
Buffer:	Phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide		

Handling

Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Handling Advice:	Do not freeze.
Storage:	4 °C
Storage Comment:	Store at 2-8°C. Do not freeze.
