Datasheet for ABIN958898
anti-RNA Polymerase antibody

Overview

| | |
|--------------|---|
| Quantity: | 10 mg |
| Target: | RNA Polymerase |
| Reactivity: | E. coli |
| Host: | Rabbit |
| Clonality: | Polyclonal |
| Application: | Western Blotting (WB), Immunofluorescence (IF), ELISA, Immunohistochemistry (IHC) |

Product Details

| | |
|---------------|--|
| Immunogen: | Escherichia coli Ribonucleic acid polymerase |
| | Type of Immunogen: Purified protein |
| Specificity: | Escherichia coli Ribonucleic acid polymerase. The reagents were evaluated for potency, purity and specificity using most or all of the following techniques: immunoelectrophoresis, cross-immunoelectrophoresis, single radial immunodiffusion (Ouchterlony), block titration, ELISA, immunoblotting and enzyme inhibition. Cross-reactivity Cross-reactivities against enzymes of other sources may occur but have not been determined. |
| Purification: | Ion exchange chromatography |

Target Details

| | |
|-------------------|---|
| Target: | RNA Polymerase |
| Alternative Name: | Ribonucleic Acid Polymerase (RNA Polymerase Products) |

Application Details

Application Notes: Approved: ELISA, IF, IHC, WB

Usage: This product is intended for use in precipitating and non-precipitating antibody-binding assays (such as e. g., ELISA and Western blotting and immunofluorescence or histochemical techniques), to prepare an insoluble immunoaffinity adsorbent, for labeling with a marker of the customer's own choice.

Restrictions: For Research Use only

Handling

Format: Lyophilized

Reconstitution: Sterile distilled water 1 ml

Concentration: Lot specific

Buffer: Lyophilized from PBS, pH 7.2

Handling Advice: Avoid repeat freeze-thaw cycles.

Storage: 4 °C, -20 °C

Storage Comment: Long term: -20°C
Short term: +4°C. Avoid repeat freeze-thaw cycles.
