Target Details

Target Type:	Antibody
Background:	<p>Synonyms: Rabbit F(ab')₂ Anti-Guinea Pig IgG Antibody Biotin Conjugation, Rabbit F(ab')₂ Anti-Guinea Pig IgG Biotin Conjugated Antibody, Rabbit Fab₂ Anti-Guinea Pig IgG Biotin Conjugated Antibody</p> <p>Background: F(ab')₂ Anti-Guinea Pig IgG Biotin Antibody was generated by enzymatic cleavage and subsequent separation from the Fc fragment. Because of their smaller size, F(ab)₂ fragments offer several advantages over intact antibodies for use in certain immunochemical techniques and experimental applications. F(ab)₂ fragments penetrate tissue samples and show better antigen recognition and signal generation in IHC. F(ab)₂ fragments lack the Fc region and therefore do not bind Fc receptors which effectively lowers background staining. F(ab')₂ Antibody is ideal for investigators who routinely perform flow cytometry, immunohistochemistry or IHC and other immunoassays.</p>

Handling Advice:

Avoid cycles of freezing and thawing.

This vial contains a relatively low volume of reagent (25 μ L). To minimize loss of volume dilute 1:10 by adding 225 μ L of the buffer stated above directly to the vial. Recap, mix thoroughly and briefly centrifuge to collect the volume at the bottom of the vial. Use this intermediate dilution when calculating final dilutions as recommended below.

Storage:

RT, 4 °C, -20 °C

Storage Comment:

Store vial at -20 °C or below prior to opening. Store the vial at -20 °C or below after dilution.
