Quantity:

Quantity.	
Target:	IgG
Binding Specificity:	Heavy & Light Chain
Reactivity:	Guinea Pig
Host:	Goat
Clonality:	Polyclonal
Conjugate:	TRITC
Application:	Flow Cytometry (FACS), FLISA, Fluorescence Microscopy (FM)
Product Details	
Immunogen:	Immunogen: Guinea Pig IgG whole molecule
Immunogen: Isotype:	Immunogen: Guinea Pig IgG whole molecule IgG
Isotype:	IgG
Isotype: Fragment:	IgG Fab fragment Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Fluorescein and
Isotype: Fragment: Specificity:	IgG Fab fragment Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Fluorescein and anti-Goat Serum. This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex

Target Details

Target:

IgG

Abstract:	IgG Products
Target Type:	Antibody
Background:	Synonyms: Goat Fab Anti-Guinea Pig Antibody Rhodamine Conjugation, Goat Fab Anti-Guinea
	Pig TRITC Conjugated Antibody
	Background: Fab Anti-Guinea Pig IgG Rhodamine Antibody generated in goat detects guinea pig
	IgG. This product possesses the F(ab) region possessing the epitope-recognition site, both
	heavy and light chains of the antibody molecule are present. Secondary Antibodies are available
	in a variety of formats and conjugate types. When choosing a secondary antibody product,
	consideration must be given to species and immunoglobulin specificity, conjugate type,
	fragment and chain specificity, level of cross-reactivity, and host-species source and fragment
	composition.

Application Details

۱ ۸	: +:	NI-+	
ADDI	ication	Notes:	

Application Note: This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms. Suitable for immunomicroscopy and flow cytometry or FACS analysis as well as other antibody based fluorescent assays requiring extremely low background levels, absence of F(c) mediated binding, lot-to-lot consistency, high titer and specificity. FLISA Dilution: 1:10,000 - 1:50,000

Flow Cytometry Dilution: 1:500 - 1:2,500 IF Microscopy Dilution: 1:1,000 - 1:5,000

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Reconstitution:	Reconstitution Volume: 1.0 mL Reconstitution Buffer: Restore with deionized water (or equivalent)
Concentration:	1.0 mg/mL
Buffer:	Buffer: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2 Stabilizer: 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free

Handling

	Preservative: 0.01 % (w/v) Sodium Azide
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Handling Advice:	Avoid cycles of freezing and thawing. Product is photosensitive and should be protected from light. Centrifuge product if not completely clear after standing at room temperature.
Storage:	RT,4 °C,-20 °C
Storage Comment:	Store vial at -20 °C prior to opening. Aliquot contents and freeze at -20 °C or below for extended storage. This product is stable for several weeks at 0 °C as an undiluted liquid.
Expiry Date:	12 months
