

## Datasheet for ABIN965337

# Goat anti-Golden Syrian Hamster IgG (Heavy & Light Chain) Antibody (Biotin) - Preadsorbed

Go to Product page

Overview	
Quantity:	1 mg
Target:	IgG
Binding Specificity:	Heavy & Light Chain
Reactivity:	Golden Syrian Hamster
Host:	Goat
Clonality:	Polyclonal
Conjugate:	Biotin
Application:	ELISA, Immunohistochemistry (IHC), Western Blotting (WB)
Product Details	
Immunogen:	Immunogen: Golden Syrian Hamster IgG whole molecule
Isotype:	IgG
Fragment:	Fab fragment
Specificity:	Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Biotin and anti-Goat Serum.
Purification:	Preadsorption: Solid phase absorption
Target Details	
Target:	IgG
Abstract:	IgG Products

#### **Target Details**

Target Type:	Antibody
Background:	Synonyms: Goat Fab Anti-Golden Syrian Hamster IgG Biotin Conjugated Antibody, Goat Fab
	Fragment Anti-Golden Syrian Hamster IgG Antibody Biotin Conjugation
	Background: Fab Anti-Golden Syrian Hamster IgG (H&L) Antibody generated in goat detects
	immunoglobulin g from hamster, both heavy and light chains of the antibody molecule are
	present. Each IgG has two antigen binding sites. Representing approximately 75 $\%$ of serum
	immunoglobulins, IgG is the most abundant antibody isotype found in the circulation. IgG
	molecules are synthesized and secreted by plasma B cells. Secondary Antibodies are available
	in a variety of formats and conjugate types. When choosing a secondary antibody product,
	consideration must be given to species and immunoglobulin specificity, conjugate type,
	fragment and chain specificity, level of cross-reactivity, and host-species source and fragment
	composition. This Fab Anti-Golden Syrian Hamster IgG Antibody is conjugated to Biotin.

#### **Application Details**

Application Notes:	Immunohistochemistr\	/ Dilution: 1:1,000 - 1:5,000

Application Note: Suitable for immunoblotting, ELISA, immunohistochemistry, immunomicroscopy as well as other antibody based assays using streptavidin or avidin conjugates requiring extremely low background levels, absence of F(c) mediated binding, lot-to-lot consistency, high titer and specificity.

ELISA Dilution: 1:200,000

Western Blot Dilution: 1:2,000 - 1:10,000

Restrictions: For Research Use only

## Handling

Format:	Lyophilized
Reconstitution:	Reconstitution Volume: 1.0 mL Reconstitution Buffer: Restore with deionized water (or equivalent)
Concentration:	1.0 mg/mL
Buffer:	Buffer: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2  Stabilizer: 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free  Preservative: 0.01 % (w/v) Sodium Azide
Preservative:	Sodium azide

## Handling

Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Handling Advice:	Avoid cycles of freezing and thawing. This vial contains a relatively low volume of reagent (25 $\mu$ L). To minimize loss of volume dilute 1:10 by adding 225 $\mu$ L of the buffer stated above directly to the vial. Recap, mix thoroughly and briefly centrifuge to collect the volume at the bottom of the vial. Use this intermediate dilution when calculating final dilutions as recommended below.
Storage:	RT,4 °C,-20 °C
Storage Comment:	Store the vial at -20 °C or below after dilution.
Expiry Date:	12 months
