Target Type:	Antibody
Background:	<p>Synonyms: Rabbit Fab Anti-Golden Syrian Hamster IgG Texas Red™ Conjugated Antibody, Rabbit Fab Fragment Anti-Golden Syrian Hamster IgG Antibody Texas Red™ Conjugation</p> <p>Background: Fab Anti-Golden Syrian Hamster IgG (H&amp;L) Antibody generated in rabbit detects hamster IgG. Representing approximately 75 % of serum immunoglobulins, IgG is the most abundant antibody isotype found in the circulation. IgG molecules are synthesized and secreted by plasma B cells. Secondary Antibodies are available in a variety of formats and conjugate types. When choosing a secondary antibody product, consideration must be given to species and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-species source and fragment composition. Fab Antibody is ideal for investigators who routinely perform flow cytometry, immunofluorescence, IHC, and other immunoassays. This Fab Anti-Golden Syrian Hamster IgG Antibody is conjugated to Texas Red™.</p>
