Abstract: [IgG Products](#)

Target Type: Antibody

Background: Synonyms: Rabbit Fab Anti-Mouse IgG Antibody Fluorescein Conjugation, Rabbit Fab Anti-Mouse IgG FITC Conjugated Antibody

Background: Fab Anti-Mouse IgG (H&L) Fluorescein Antibody generated in rabbit detects Mouse IgG. This product possesses the F(ab) region possessing the epitope-recognition site, both heavy and light chains of the antibody molecule are present. Secondary Antibodies are available in a variety of formats and conjugate types. When choosing a secondary antibody product, consideration must be given to species and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-species source and fragment composition.

Application Details

Application Notes: Application Note: Suitable for immunomicroscopy and flow cytometry or FACS analysis as well as other antibody based fluorescent assays requiring extremely low background levels, absence of F(c) mediated binding, lot-to-lot consistency, high titer and specificity. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.
