Product Details

Immunogen:	Polyclonal antibody produced in rabbits immunizing with a synthetic peptide corresponding to N-terminal residues of human BAZ1B (bromodomain adjacent to zinc finger domain, 1B)
Purification:	Purified by antigen-specific affinity chromatography.

Target Details

Target:	BAZ1B
Alternative Name:	BAZ1B (BAZ1B Products)
Background:	The BAZ1B (bromodomain adjacent to zinc finger domain, 1B) is a member of the bromodomain protein family. The bromodomain is a structural motif characteristic of proteins involved in chromatin-dependent regulation of transcription. This gene is deleted in Williams-Beuren syndrome, a developmental disorder caused by deletion of multiple genes at 7q11.23.

Target Details

Alternative splicing of this gene generates at least 2 transcript variants.
