anti-CLOCK antibody (N-Term)[Go to Product page](#)**1** Publication

Overview

Quantity:	0.1 mg
Target:	CLOCK
Binding Specificity:	N-Term
Reactivity:	Human, Mouse
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This CLOCK antibody is un-conjugated
Application:	Immunohistochemistry (IHC)

Product Details

Immunogen:	Polyclonal antibody produced in rabbits immunizing with a synthetic peptide corresponding to N-terminal residues of human CLOCK(Circadian locomoter output cycles protein kaput)
Purification:	Purified by antigen-specific affinity chromatography.

Target Details

Target:	CLOCK
Alternative Name:	CLOCK (CLOCK Products)
Background:	CLOCK(Circadian locomoter output cycles protein kaput) is a circadian regulator that acts as a transcription factor. CLOCK-BMAL1 heterodimers bind to an E-box element (3'-CACGTG-5'), thereby activating transcription of PER1, and possibly of other circadian clock proteins. Mutant CLOCK and BMAL1 form heterodimers that bind DNA, but fail to activate transcription. CLOCK

Target Details

belongs to the basic helix-loop-helix (bHLH) family of transcription factors. Polymorphisms within the encoded protein have been associated with circadian rhythm sleep disorders. A similar protein in mice is a circadian regulator that acts as a transcription factor and forms a heterodimer with aryl hydrocarbon receptor nuclear translocator-like to activate transcription of mouse period 1.

Pathways: [Regulation of Lipid Metabolism by PPARalpha](#), [Photoperiodism](#)

Application Details

Application Notes: ELISA, Western blotting: 1µg/ml for 2hrs.

Restrictions: For Research Use only

Handling

Format: Liquid

Buffer: This antibody is stored in PBS, 50% glycerol

Preservative: Sodium azide

Precaution of Use: This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Storage: -20 °C
