## Datasheet for ABIN968091 anti-RAB11A antibody (AA 86-207)

3 Images

5 Publications

#### Overview

Quantity:	150 µg
Target:	RAB11A
Binding Specificity:	AA 86-207
Reactivity:	Human, Mouse, Rat, Dog, Chicken
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This RAB11A antibody is un-conjugated
Application:	Western Blotting (WB), Immunohistochemistry (IHC), Immunoprecipitation (IP)

## Product Details

Immunogen:	Human Rab11 aa. 86-207
Clone:	47-Rab11
lsotype:	lgG2a
Cross-Reactivity:	Dog (Canine), Chicken, Mouse (Murine), Rat (Rattus)
Characteristics:	<ol> <li>Since applications vary, each investigator should titrate the reagent to obtain optimal results</li> <li>Please refer to us for technical protocols.</li> <li>Caution: Sodium azide yields highly toxic hydrazoic acid under acidic conditions. Dilute azide compounds in running water before discarding to avoid accumulation of potentially explosive deposits in plumbing.</li> <li>Source of all serum proteins is from USDA inspected abattoirs located in the United States.</li> </ol>
Purification:	The monoclonal antibody was purified from tissue culture supernatant or ascites by affinity

### Product Details

chromatography.

## Target Details

Tanaati	
Target:	RAB11A
Alternative Name:	Rab11 (RAB11A Products)
Background:	The Rab proteins are small GTP-binding molecules that are localized to specific intracellular
	vesicles and organelles. It has been proposed that Rab proteins cycle between GTP- and GDP-
	bound forms and that this is related to their function as regulators of vesicular traffic. The
	Rab11 gene encodes a 24 kDa protein of 214 amino acids that has been detected in liver, brain,
	testis, spleen, and heart. Rab11 protein was isolated from the golgi-microsomal fraction of rat
	liver and has been detected in the Trans-golgi Network, secretory vesicles, and the pericentriola
	recycling endosomes. The distribution of Rab11 indicates that this small protein is involved in
	regulating traffic at the Golgi complex.
Molecular Weight:	24 kDa
Pathways:	Regulation of Cell Size, Thromboxane A2 Receptor Signaling, Regulation of long-term Neuronal
	Synaptic Plasticity
Application Details	
Comment:	Related Products: ABIN968619, ABIN967389
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Concentration:	250 μg/mL
Buffer:	Aqueous buffered solution containing BSA, glycerol, and $\leq 0.09$ % sodium azide.
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which
	should be handled by trained staff only.
Storage:	-20 °C
Storage Comment:	Store undiluted at -20°C.
