<tr>
<td>Background</td>
<td>Description: This gene encodes a 105 kD protein which can undergo cotranslational processing by the 26S proteasome to produce a 50 kD protein. The 105 kD protein is a Rel protein-specific transcription inhibitor and the 50 kD protein is a DNA binding subunit of the NF-kappa-B (NFkB) protein complex. NFKB is a transcription regulator that is activated by various intra- and extra-</td>
</tr>
</tbody>
</table>
### Target Details

Cellular stimuli such as cytokines, oxidant-free radicals, ultraviolet irradiation, and bacterial or viral products. Activated NFκB translocates into the nucleus and stimulates the expression of genes involved in a wide variety of biological functions. Inappropriate activation of NFκB has been associated with a number of inflammatory diseases while persistent inhibition of NFκB leads to inappropriate immune cell development or delayed cell growth. Two transcript variants encoding different isoforms have been found for this gene.

**Aliases:** p50, KBF1, p105, EBP-1, MGC54151, NFκB-p50, NFκB, NF-kappaB, NFκB-p105, NF-kappa-B

**Pathways:**
- p53 Signaling
- NF-κB Signaling
- RTK Signaling
- TCR Signaling
- TLR Signaling
- Fc-ε receptor signaling pathway
- Neurotrophin signaling pathway
- Activation of innate immune response
- Myometrial relaxation and contraction
- Regulation of carbohydrate metabolic process
- Hepatitis C
- Toll-like receptors cascades
- BCR signaling
- S100 proteins

### Application Details

**Application Notes:**
- ELISA: 1:10000
- WB: 1:500 - 1:2000
- IHC: 1:200 - 1:1000
- ICC: 1:200 - 1:1000
- FCM: 1:200 - 1:400

**Restrictions:** For Research Use only

### Handling

**Format:** Liquid

**Buffer:** Ascitic fluid containing 0.03% sodium azide.

**Preservative:** Sodium azide

**Precaution of Use:**

This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

**Storage:** 4 °C/-20 °C

**Storage Comment:** 4°C, -20°C for long term storage
**Images**

**Western Blotting**

**Image 1.** Western blot analysis using NFKB1 mouse mAb against K562 (1), Jurkat (2), A431 (3), Hela (4), THP-1 (5) and MCF-7 (6) cell lysate.

**ELISA**

**Image 2.** Red: Control Antigen (100 ng), Purple: Antigen (10 ng), Green: Antigen (50 ng), Blue: Antigen (100 ng).

**Flow Cytometry**

**Image 3.** Flow cytometric analysis of MCF-7 cells using NFKB1 mouse mAb (green) and negative control (purple).

Please check the [product details page](#) for more images. Overall 5 images are available for ABIN969313.
